

Canine Sports LLC is a dog training facility located in Vermilion, Ohio. We opened our doors in January 2008 with a 3,000 square foot building. Considerable effort was spent on determining the best matting for the building. We train dogs in the sport of agility and it is critical that the dogs land on padded reinforced matting. At least 5 mats were reviewed and we ended up choosing the padded squares from Get Rung. On top of these very comfy squares we laid a thin rubber matting to control slipping of the dogs. For one year we have been using this matting and absolutely love it. I can personally attest that at the end of 5 hours of teaching my legs are not tired or sore – which was *not* the case at a prior training facility where I taught. My dogs love it too!!

When we chose to expand to 6,000 square feet last month, we did not hesitate on the matting issue. A quick call to Get Rung and we were laying matting within a week. Great service and a great product!!!
